Trouble Shooting

When calling the ASET Service Desk for assistance, identify that your system sign-in issue is with New AFIS, not the current, legacy AFIS. An easy way to communicate this is to indicate that you are accessing the system using a URL.

- URL does not work
 - When you find that you cannot access the system, you should contact your Agency Level 1 Support.
- Forgotten Password
 - This Quick Reference Guide provides instructions on how to establish a password hint when changing your temporary password. In this way, you are able to reset your own password.
 - You can request a password reset by contacting the ASET Service Desk at 602-364-4444. Note: If you call for ASET Service Desk assistance, only you can call to request a password reset; the temporary password will be emailed to your agency email address.
- Locked User
 - You have 6 attempts to enter the correct password before being locked out of the system. Once you are locked out, you must request a new temporary password from the ASET Service Desk.
 - Contact the ASET Service Desk at 602-364-4444.
- Incomplete user access
 - If you discover that you need additional or revised user security rights, use the UDOC process in New AFIS to request the revisions. If you need assistance with this, contact your Agency Level 1 Support resource.
 - If you believe that you have the right authorization and it appears not to be functioning, contact your Agency Level 1 Support resource.
